

Calling all Organisations and Practitioners interested in Renewable Energy and Social Impact Across Africa!

Connect

Participate

Strengthen

Are you an organisation or individual working on social performance topics such as human rights, social license to operate, community benefits or community engagement within the large-scale renewable energy sector or other related fields?

Are you open to collaboration, mutual learning, and sharing practical solutions with others working in the space? We would like to hear from you!

INSPIRE is on a mission to connect with likeminded (or like-interested) individuals and organisations across the African continent!

Let's come together to grow a connected, informed, and action-oriented network.
